

XJ Cherokee Airtube

PART #: XJAT-1 APPLICATION: '84-'01 Jeep Cherokees

Rusty's Air Tube is one of the best things you can add to your vehicle. The air tube can be installed in about 10 minutes and will deliver 5 to 10 horsepower and will greatly improve fuel economy. Rusty's offers two K&N filters to fit the Rusty's Air Tube which must be ordered separately. The 4.5 x 5 standard filters are plenty of filter for the 2.5 and the 4.0 liter engine. The 6 x 9 is recommended for the V8 engines and can be used on the 2.5 and 4.0 engines for a mean and muscle car look.

- 1) Raise the hood and locate the factory air box.
- 2) Remove factory air box lid, remove filter, remove bolts and nuts holding air box in place. The Rusty's air tube support will bolt to the rear air box mounting bolt, Leave loose till further instructed.
- 3) Slip the rubber 90 hose that's mounted to the throttle body over the Rusty's air tube, or over the rubber elbow supplied, depending on the year. Tighten the clamp now.
- 4) Slide the K&N filter over the Rusty's air tube and tighten clamp. At this time you want to tighten the support brace.
- 5) Be sure the K&N filter doesn't touch or rub the body in any place, this will cause a hole in the filter and could cause damage to the engine.
- 6) The breather tube from the engine can now be fitted to the air tube.
- 7) Please go back and check all bolts and clamps before lowering the hood. On some models there may be small vacuum line attached to the air box , these lines can be followed to the in-take manifold and plugged , they will no longer be used. Read the K&N filter instructions on doing service to the filter.

WARNING

RECHECK ALL BOLTS AND NUTS ONCE COMPLETED AND AFTER THE FIRST 300 MILES. ALTHOUGH ALL OF OUR PRODUCTS ARE MADE FROM THE HIGHEST QUALITY POSSIBLE, THEY ARE NOT A SUBSTITUTE FOR SAFE AND CAREFUL DRIVING. IN OTHER WORDS GOOD SAFE ON-ROAD / OFF ROAD SENSE. KNOW THE TERRAIN, THE SPEED LIMITATIONS, AND ANY OBSTACLES THAT MAY LIE AHEAD. PLEASE REMEMBER TO PRESERVE OUR RIGHT TO ENJOY PUBLIC LAND THROUGH THE PROPER USE OF OFF-ROAD VEHICLES.
